### Announcements and Information

#### Update on the Corona Virus

Pro-Vision Academy Charter School District is closely monitoring various sources of information regarding the Corona Virus, including the Center for Disease Control. We have been informed that there are no known cases of the Corona Virus in the State of Texas; however, this provides a good opportunity to review “best practices” for staying healthy during the flu season.

The Flu Virus symptoms and Corona Virus symptoms are very similar (**fever, body aches, coughing and generally, just not feeling well**). If you are experiencing any of the above symptoms, you may need to seek medical attention. The doctor can do a simple test to get the proper diagnosis and treatment.

We will continue monitoring the Center for Disease Control and the Harris County Health Department for any new information, and we will keep you updated as more information becomes available. In the meantime, continue to wash your hands frequently, keep your hands away from your face, cover your coughs and sneezes and limit exposure to family members and others that may be ill.

If you feel ill or have concerns, please contact your healthcare provider, and visit the links below for additional information.
